

NEW ROCKWOOL MULTIFIX™

Build a better low-slope roof.

Multi-innovative.
A stone wool insulation
and coverboard in one.

The Challenge

Contractors and building operators are under pressure to deliver on time and on budget.

CONTRACTOR

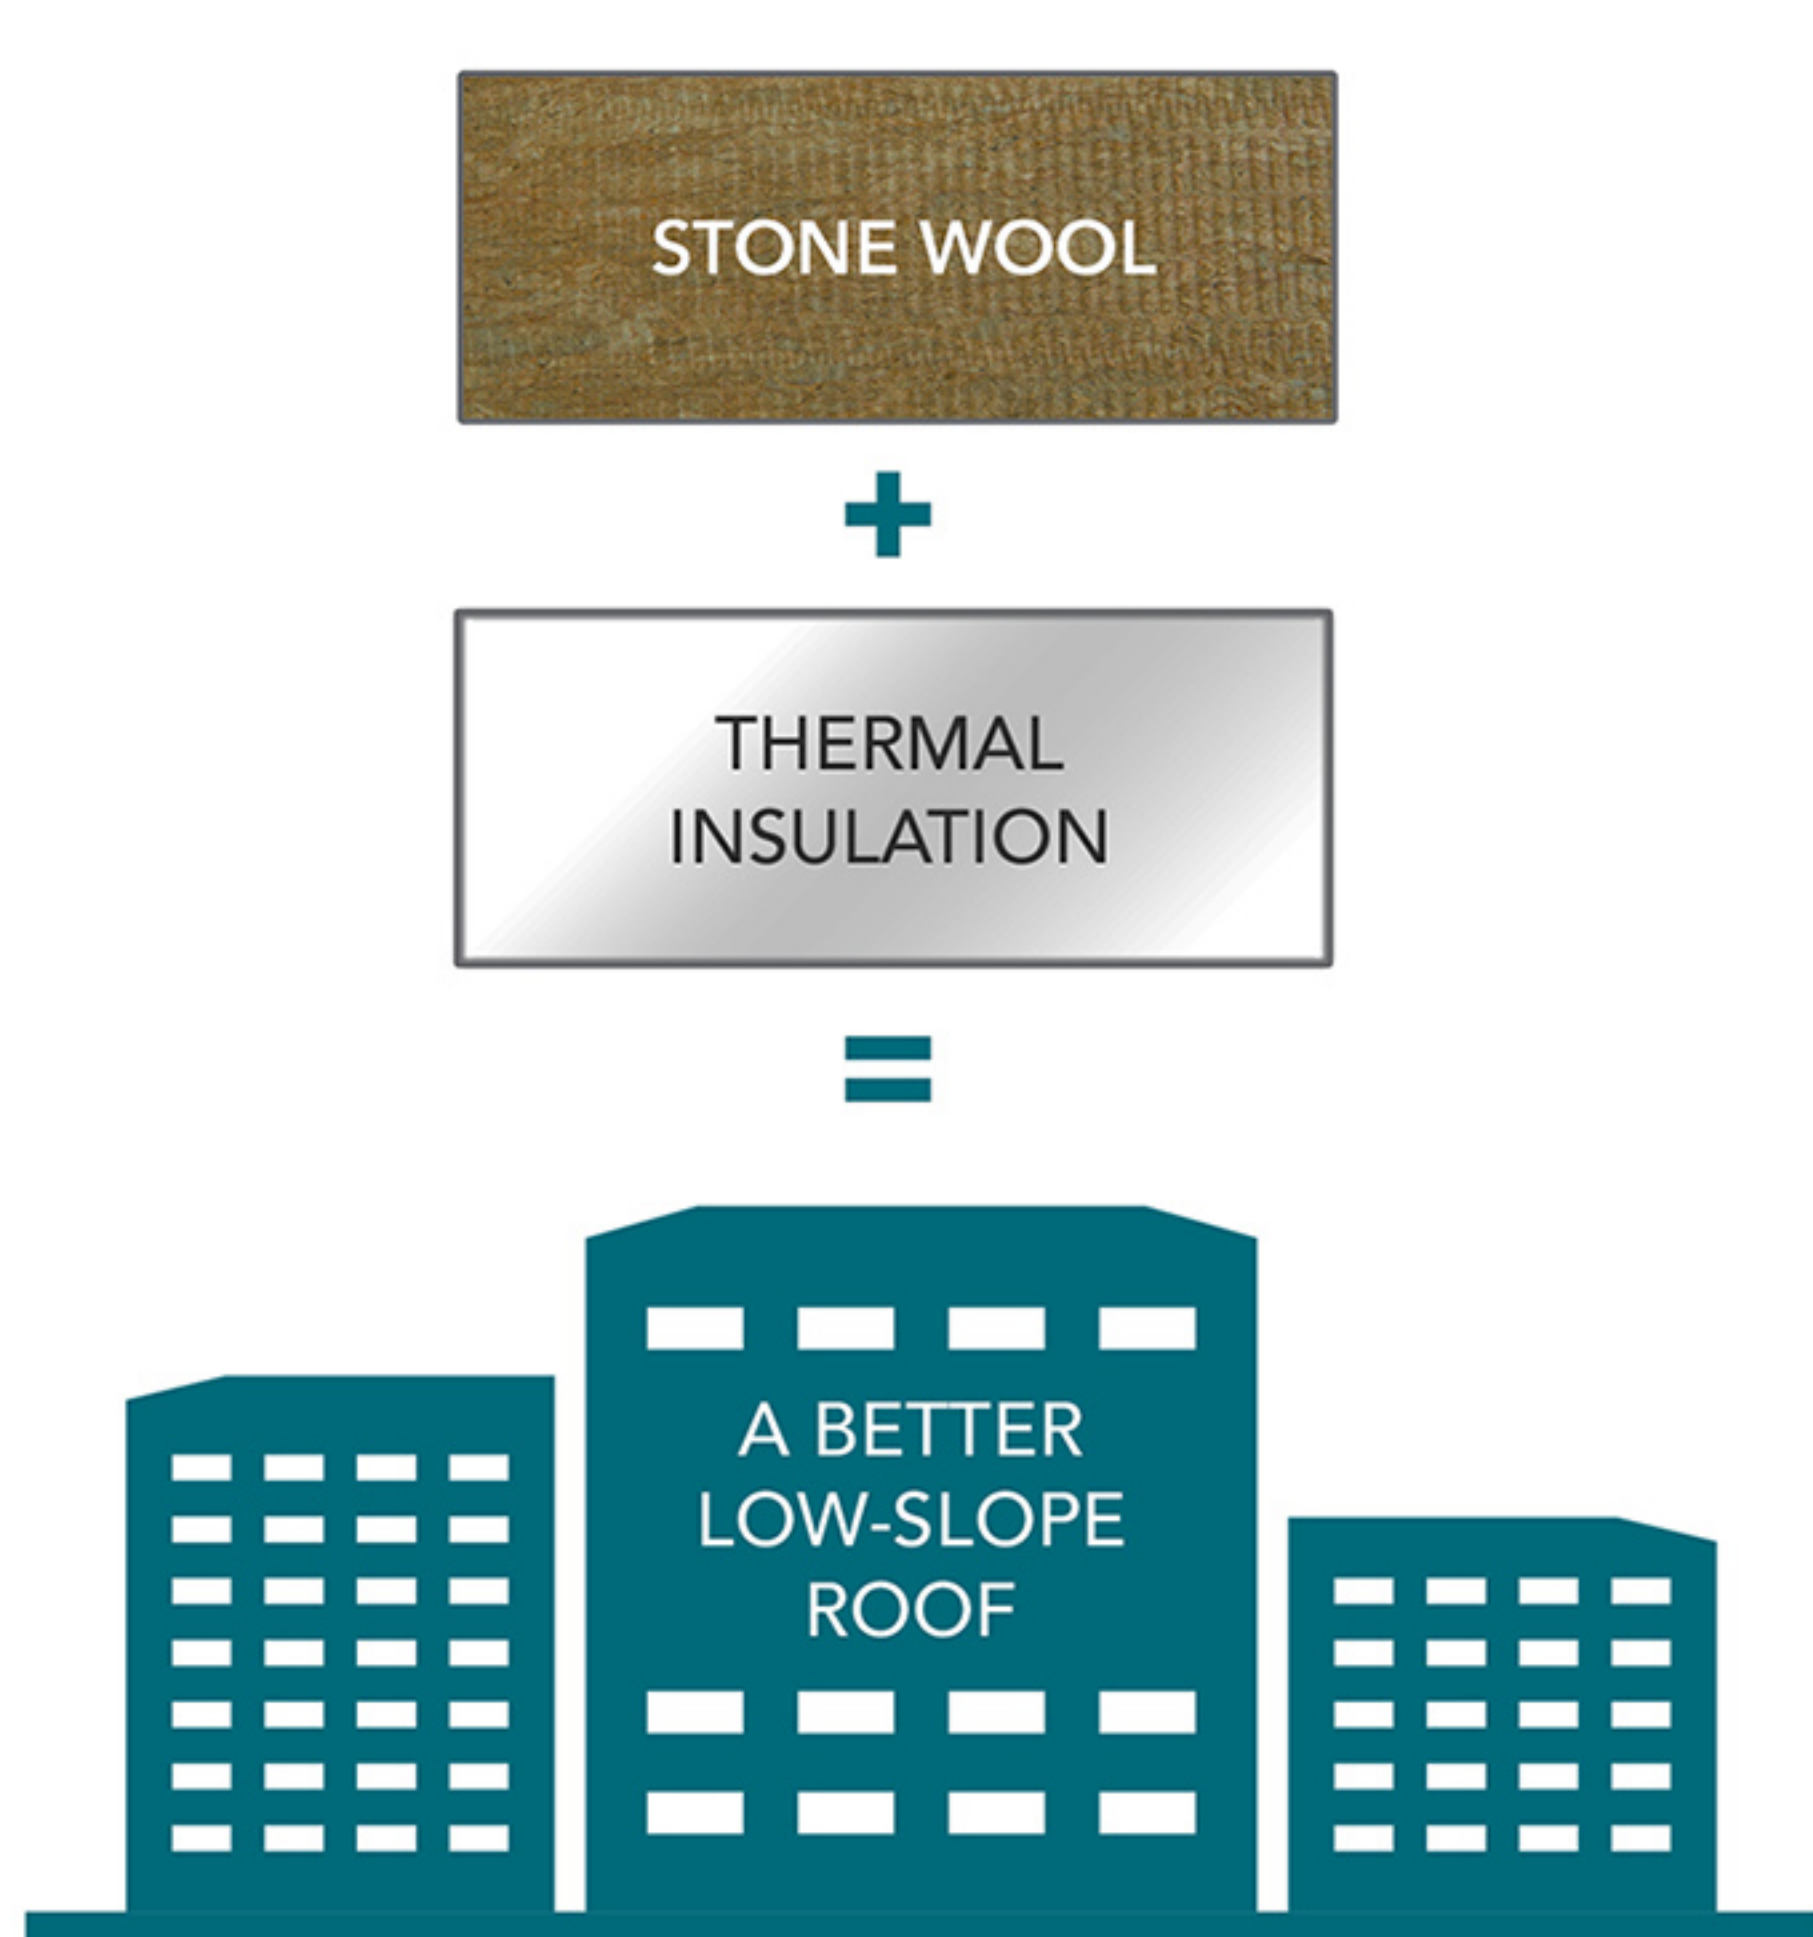

Needs efficient jobsite management.

BUILDING OPERATOR

Needs long-term cost savings & building performance.

The Solution

A new hybrid roofing insulation solution that delivers the best of both worlds on performance, time and savings.

ADDED FIRE RESISTANCE

IMPROVED DIMENSIONAL STABILITY

INCREASED PERFORMANCE IN WIDER TEMPERATURE RANGES

HIGHER QUALITY AND AFFORDABILITY

MORE PROFITABLE PROJECTS FOR THE CONTRACTOR

Save valuable time with fewer layers to install and enjoy the convenience of working with a single product that's compatible with multiple applications. Easily cut to any size, it also won't curl the way some other products do.

MORE LONG-TERM SAVINGS FOR THE BUILDING OPERATOR

Expect reduced energy costs from the improved energy performance and more occupant comfort from the increased sound absorbency.

Plus, less installation time means less disruption for everyone.

NEW ROCKWOOL MULTIFIX™

It's a dual-density, rigid roofing insulation faced with a high-performance, mineral-coated fiberglass layer.

The Proof

Tested and approved for a number of membrane systems

Only stone wool products are FM 4470 - Non-Combustible Core rated

Up to 30-year Limited Thermal Warranty guaranteeing originally declared R-value of roofing insulation products

Fewer layers. Rock solid results.
